SUMMARY

Highly analytical Computer Science Graduate and AI Engineer specializing in multi-agent systems, RAG architecture, and backend automation. Proficient in Python, LangChain, OpenAI models, and FastAPI, with deep practical knowledge in tracing and optimizing LLM workloads via LangSmith. Proven ability to bridge advanced machine learning models with robust, self-hosted system infrastructure to deliver secure, enterprise-level AI applications.

Experience

Tahcom

Jan. 2026 – Present

AI specialist

- **Automation & Market Intelligence:** Conceptualized and developed a Python-based automated tool to gather business intelligence and generate data-driven reports on AI market opportunities, Evaluated the technical capabilities and safety standards of potential AI software solutions and B2B partnerships to expand service offerings.
- **AI-Powered Workflows:** Designed and deployed automated system integrations using **XML-RPC** and **Power Automate**, bridging Odoo CRM with external platforms to automate internal data flows.
- **System Integration:** Developed end-to-end automation strategies that reduced operational bottlenecks, ensuring high data accuracy across internal B2B platforms.

TECHNICAL INFRASTRUCTURE PROJECTS

Personal Infrastructure Lab | Lead Hardware & Systems Admin |

Mar. 2021 – Present

- **CI/CD & Version Control:** Implemented continuous integration pipelines using Gitea and Woodpecker CI deployed via Docker on a Proxmox environment.
- **Infrastructure & Deployment:** Architected and maintained a highly available server environment with redundant storage arrays (ZFS, RAID 1), Managed local and wide-area network concepts, IP allocations, and routed traffic securely.

Dismart (Graduation Project)

Jan. 2025 – Dec. 2025

- **Real-World Model Validation:** Trained and optimized a machine learning classification pipeline using **Scikit-Learn**, achieving **93.81% validation accuracy** and an **AUC score of 0.9497** on unseen clinical testing datasets.
- **Inference Pipeline Optimization:** Serialized and embedded machine learning logic directly into a high-performance **FastAPI** service layer, parsing complex multi-tier JSON payloads to handle low-latency real-time data classifications.

PROFESSIONAL DEVELOPMENT & AWARDS

Agentic AI Bootcamp

June 2026

Saudi Digital Academy – We Cloud Data

- **Engineered High-Performance RAG Pipelines:** Built robust Retrieval-Augmented Generation (RAG) systems integrating advanced embedding models and vector search to enable precise, context-aware data retrieval for production workflows.
- **Optimized & Debugged Agentic Workflows:** Leveraged **LangSmith** to profile agent execution, debug nested chain latency, track token consumption, and trace LLM calls to significantly improve system reliability and cost-efficiency.
- **Architected Multi-Agent Systems via LangChain:** Designed and deployed autonomous AI agents utilizing LangChain for state management and complex reasoning, orchestrating advanced tool-calling workflows powered by OpenAI models.

Top 3 Innovation Award, Tourism & Entertainment Track

Software AG Future Disruptors Program LEAP 2024

March 2024

- Recognized for exceptional performance and innovative contributions.
- Successfully completed specialized training modules as part of the Future Disruptors Program, demonstrating expertise in industrial IoT and enterprise integration technologies.

EDUCATION

Taibah University

January 2026

Bachelor of Science, Computer Science

SKILLS

Systems & Infrastructure: Proxmox Virtualization, Docker, ZFS & RAID 1, Server Maintenance, Hardware Diagnosis.

Networking & Support: IP Allocation, Network Routing, Traffic Security, System Monitoring, Root-Cause Analysis.

DevOps & Architecture: Docker, Proxmox, Git, Linux, Gitea, Woodpecker CI.

Databases & Integration: Odoo CRM, Power Automate, Integration WebMethods.

Tools & Languages: Python, SQL, R, Kotlin, XML-RPC, JSON parsing, Taiga (Agile), Pandas, FastAPI, RESTful API, Classical ML (Random Forest), scikit-learn, Model Evaluation, Dataframes, LangSmith, LangChain, RAG, Streamlit

Languages: Arabic (Native), English (Professional Working Proficiency).
